ANATOMY OF BARE METAL SWITCHES

PROBLEMS OF WELL-KNOWN VENDOR APPROACH

- **Very hard or impossible to customize**
- **No selection of Operating System**
- **Vendor lock-in**
- **Management software is vendor specific**
- **High Total Cost of ownership**

This is A White-box or Bare Metal Switch

**With Full line-rate L2/L3 Ports, 1.44 Tbps switching capacity, 720ns latency,
Hot-swappable 2 power supplies, 4+1 Fans**

48 X 10G SFP+

6 X 40G QSFP

This switch is Based on Broadcom Trident 2+ ASIC

All Those switches are built on the same ASIC - thus they all have similar hw capabilities

Extreme Summit X770

HP 5930

Dell S6000

Nuage 7850 VSG

Juniper QFX 3500

Trident II

Cumulus Networks

HCL: Agema, Edge-Core, Penguin Computing, Quanta

Cisco Nexus 3100

Cisco Nexus 9000

Arista 7500E

Arista 7250X

BUT this switch cost 2-5 times less comparing with big vendors

48 X 10G SFP+

6 X 40G QSFP

**It allows to install NOS of our choice
Like we can install OS of our choice when we buy some servers**

48 X 10G SFP+

6 X 40G QSFP

2-5 times lower price

**There are at least 8 vendors which offer
similar switches for similar price**

48 X 10G SFP+

6 X 40G QSFP

2-5 times lower price

NOS of your choice

Hewlett Packard
Enterprise

Not Locking to vendor

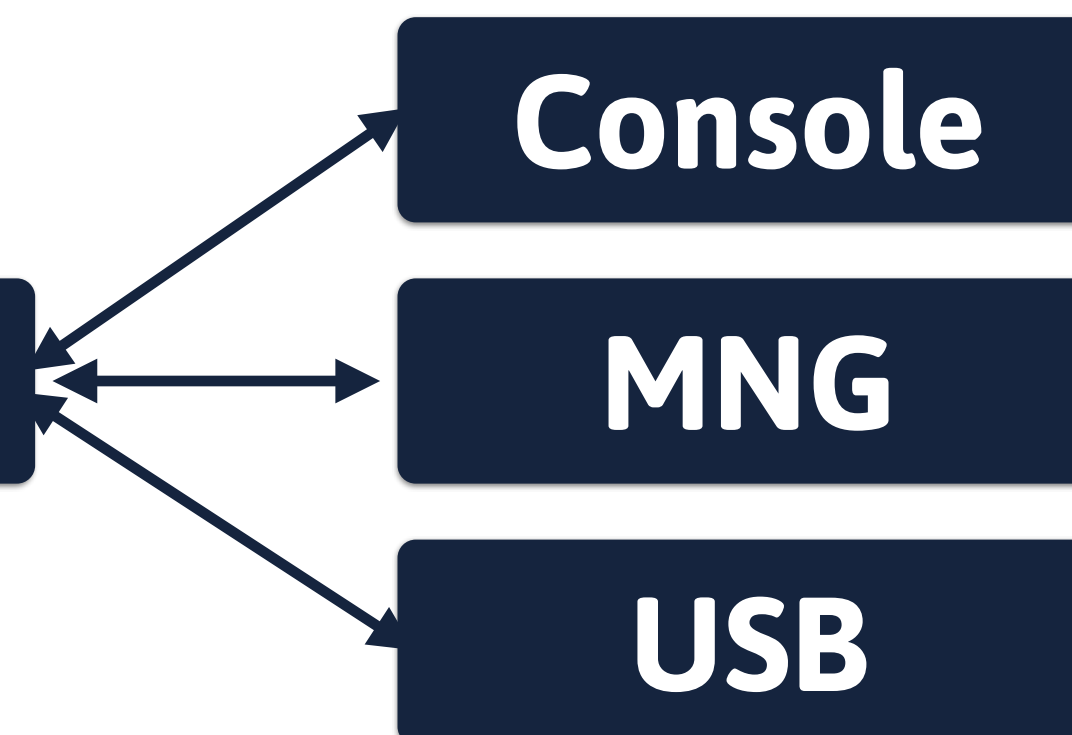

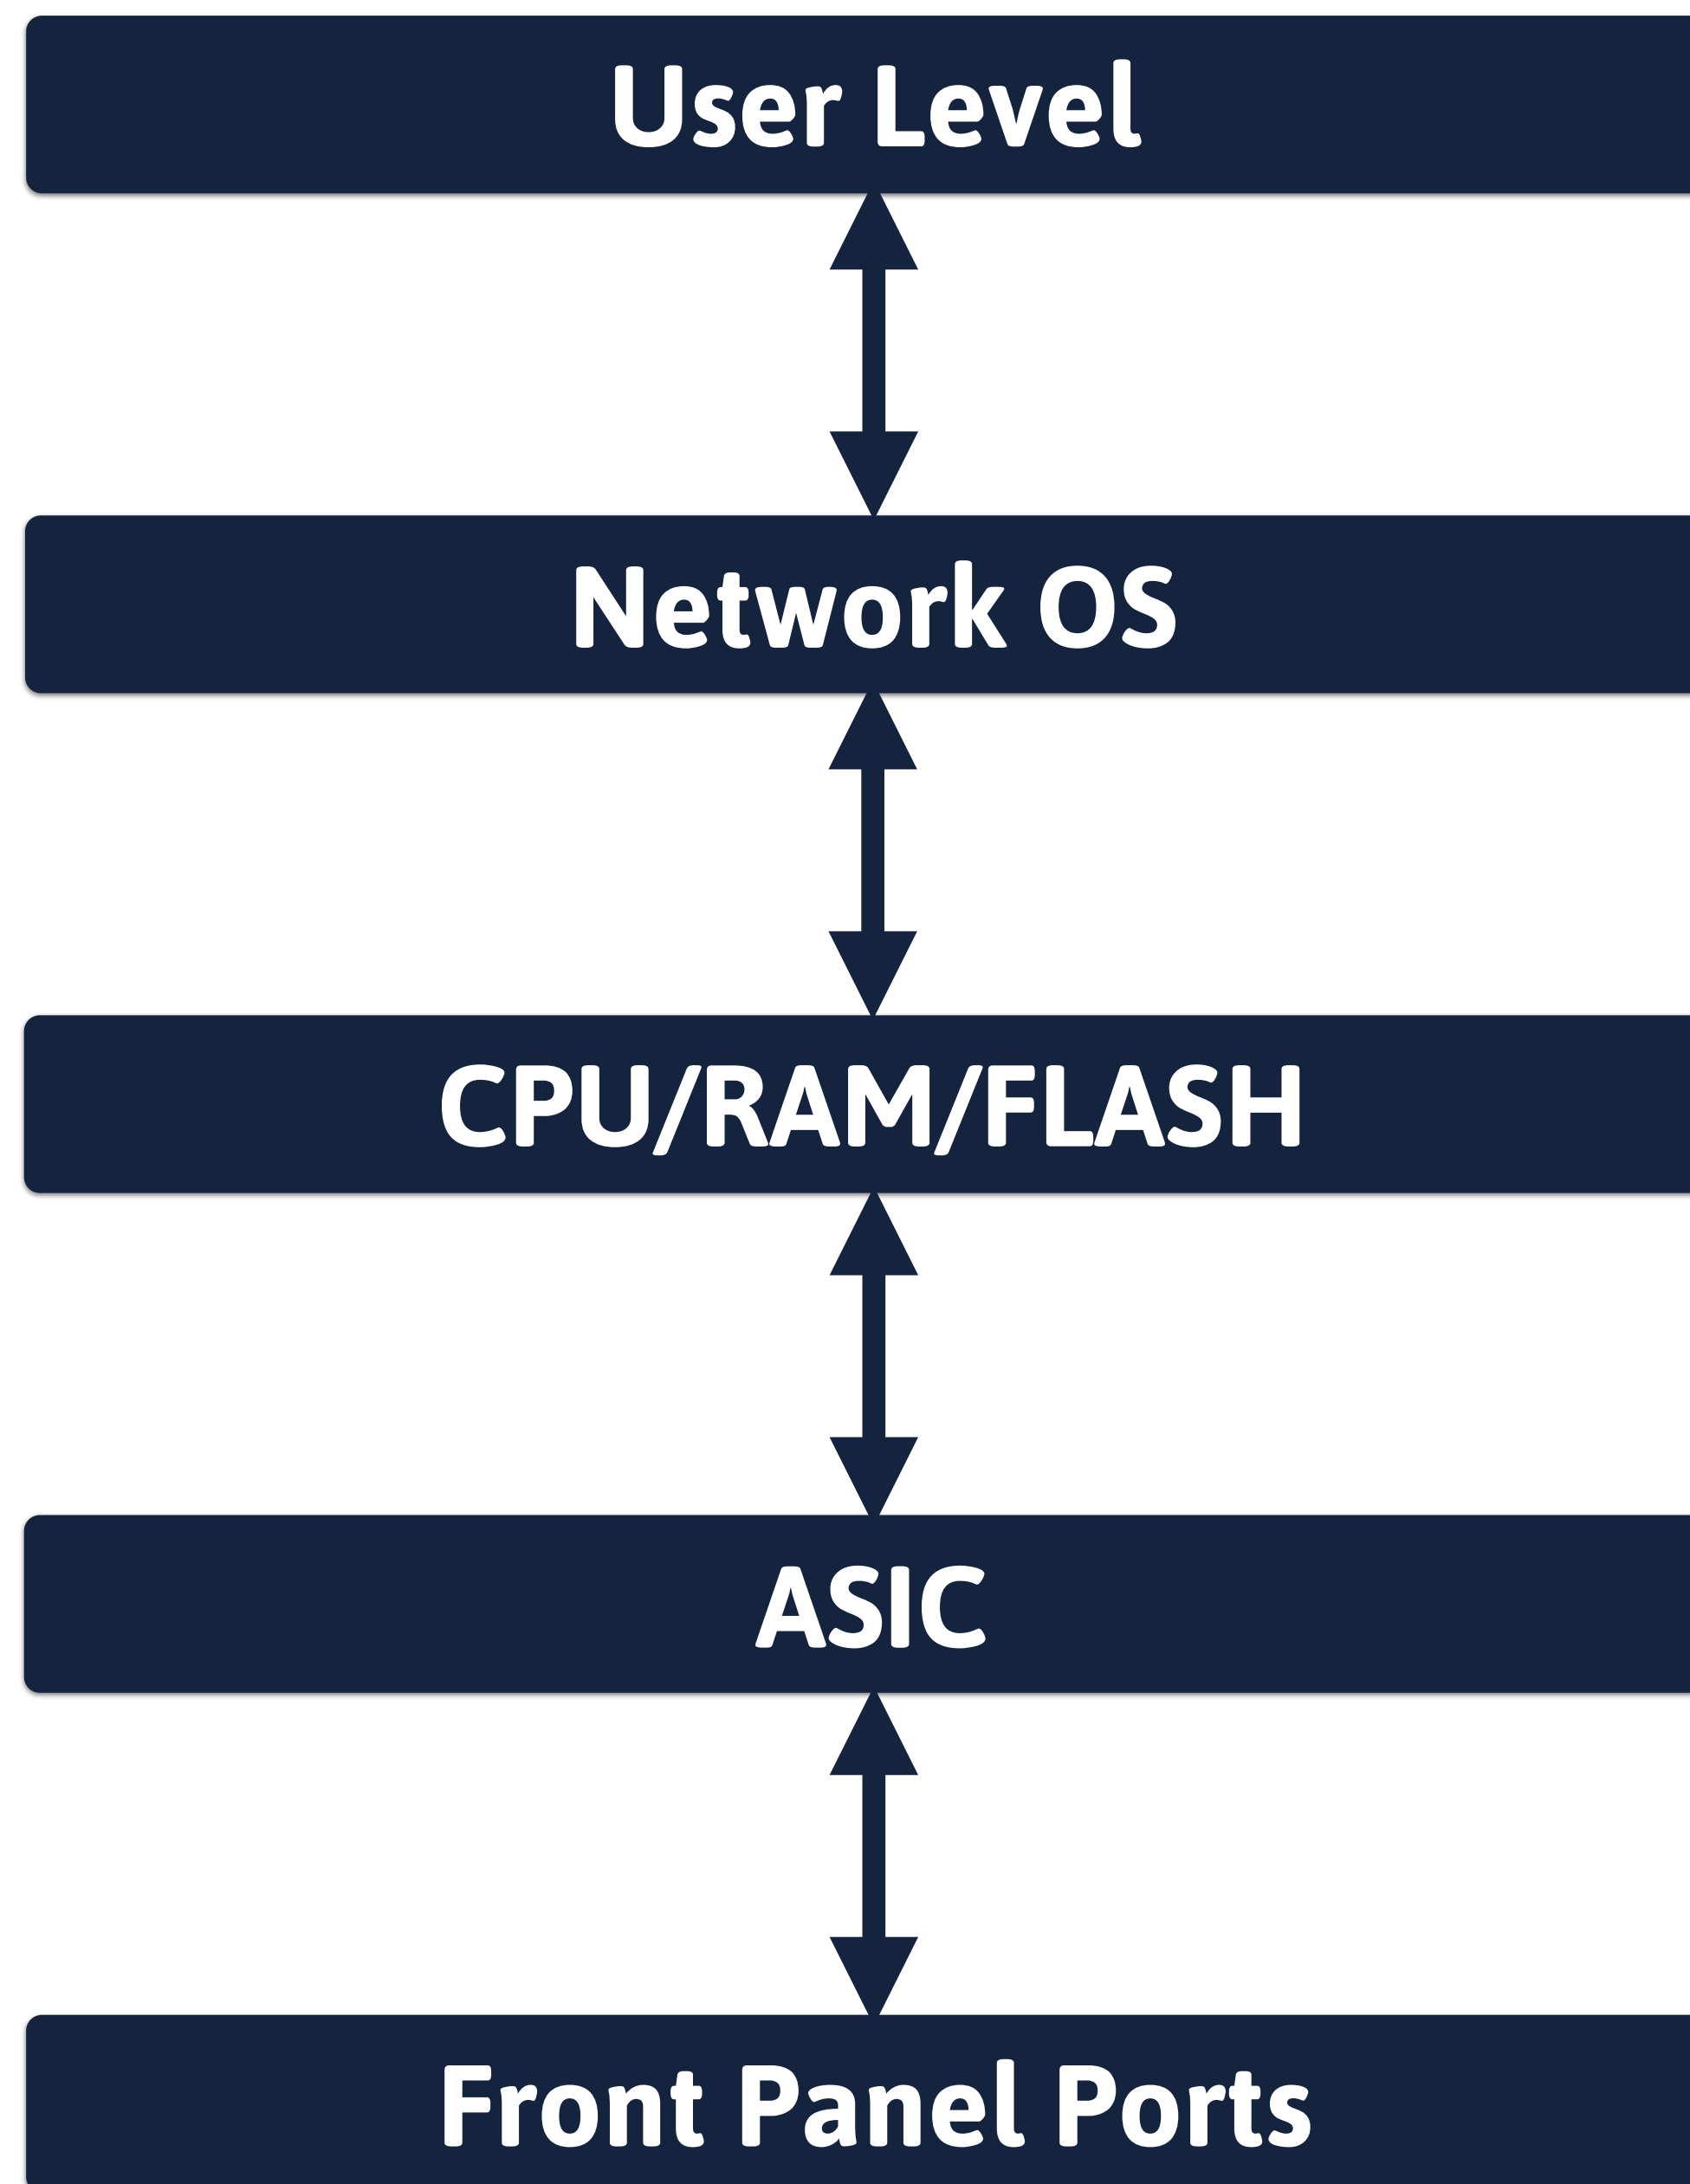

48 X 10G SFP+

6 X 40G QSFP

2-5 times lower price

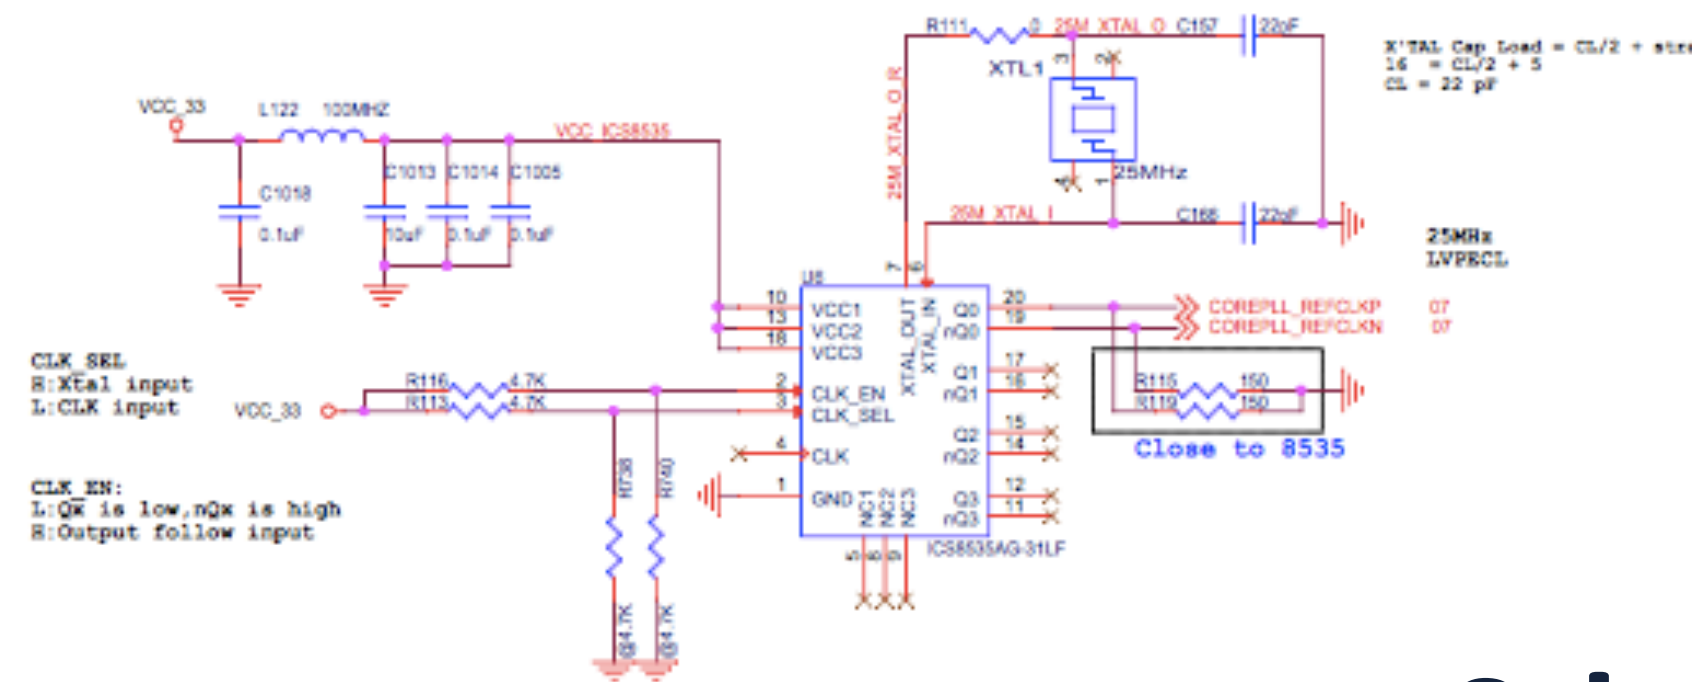

NOS of your choice

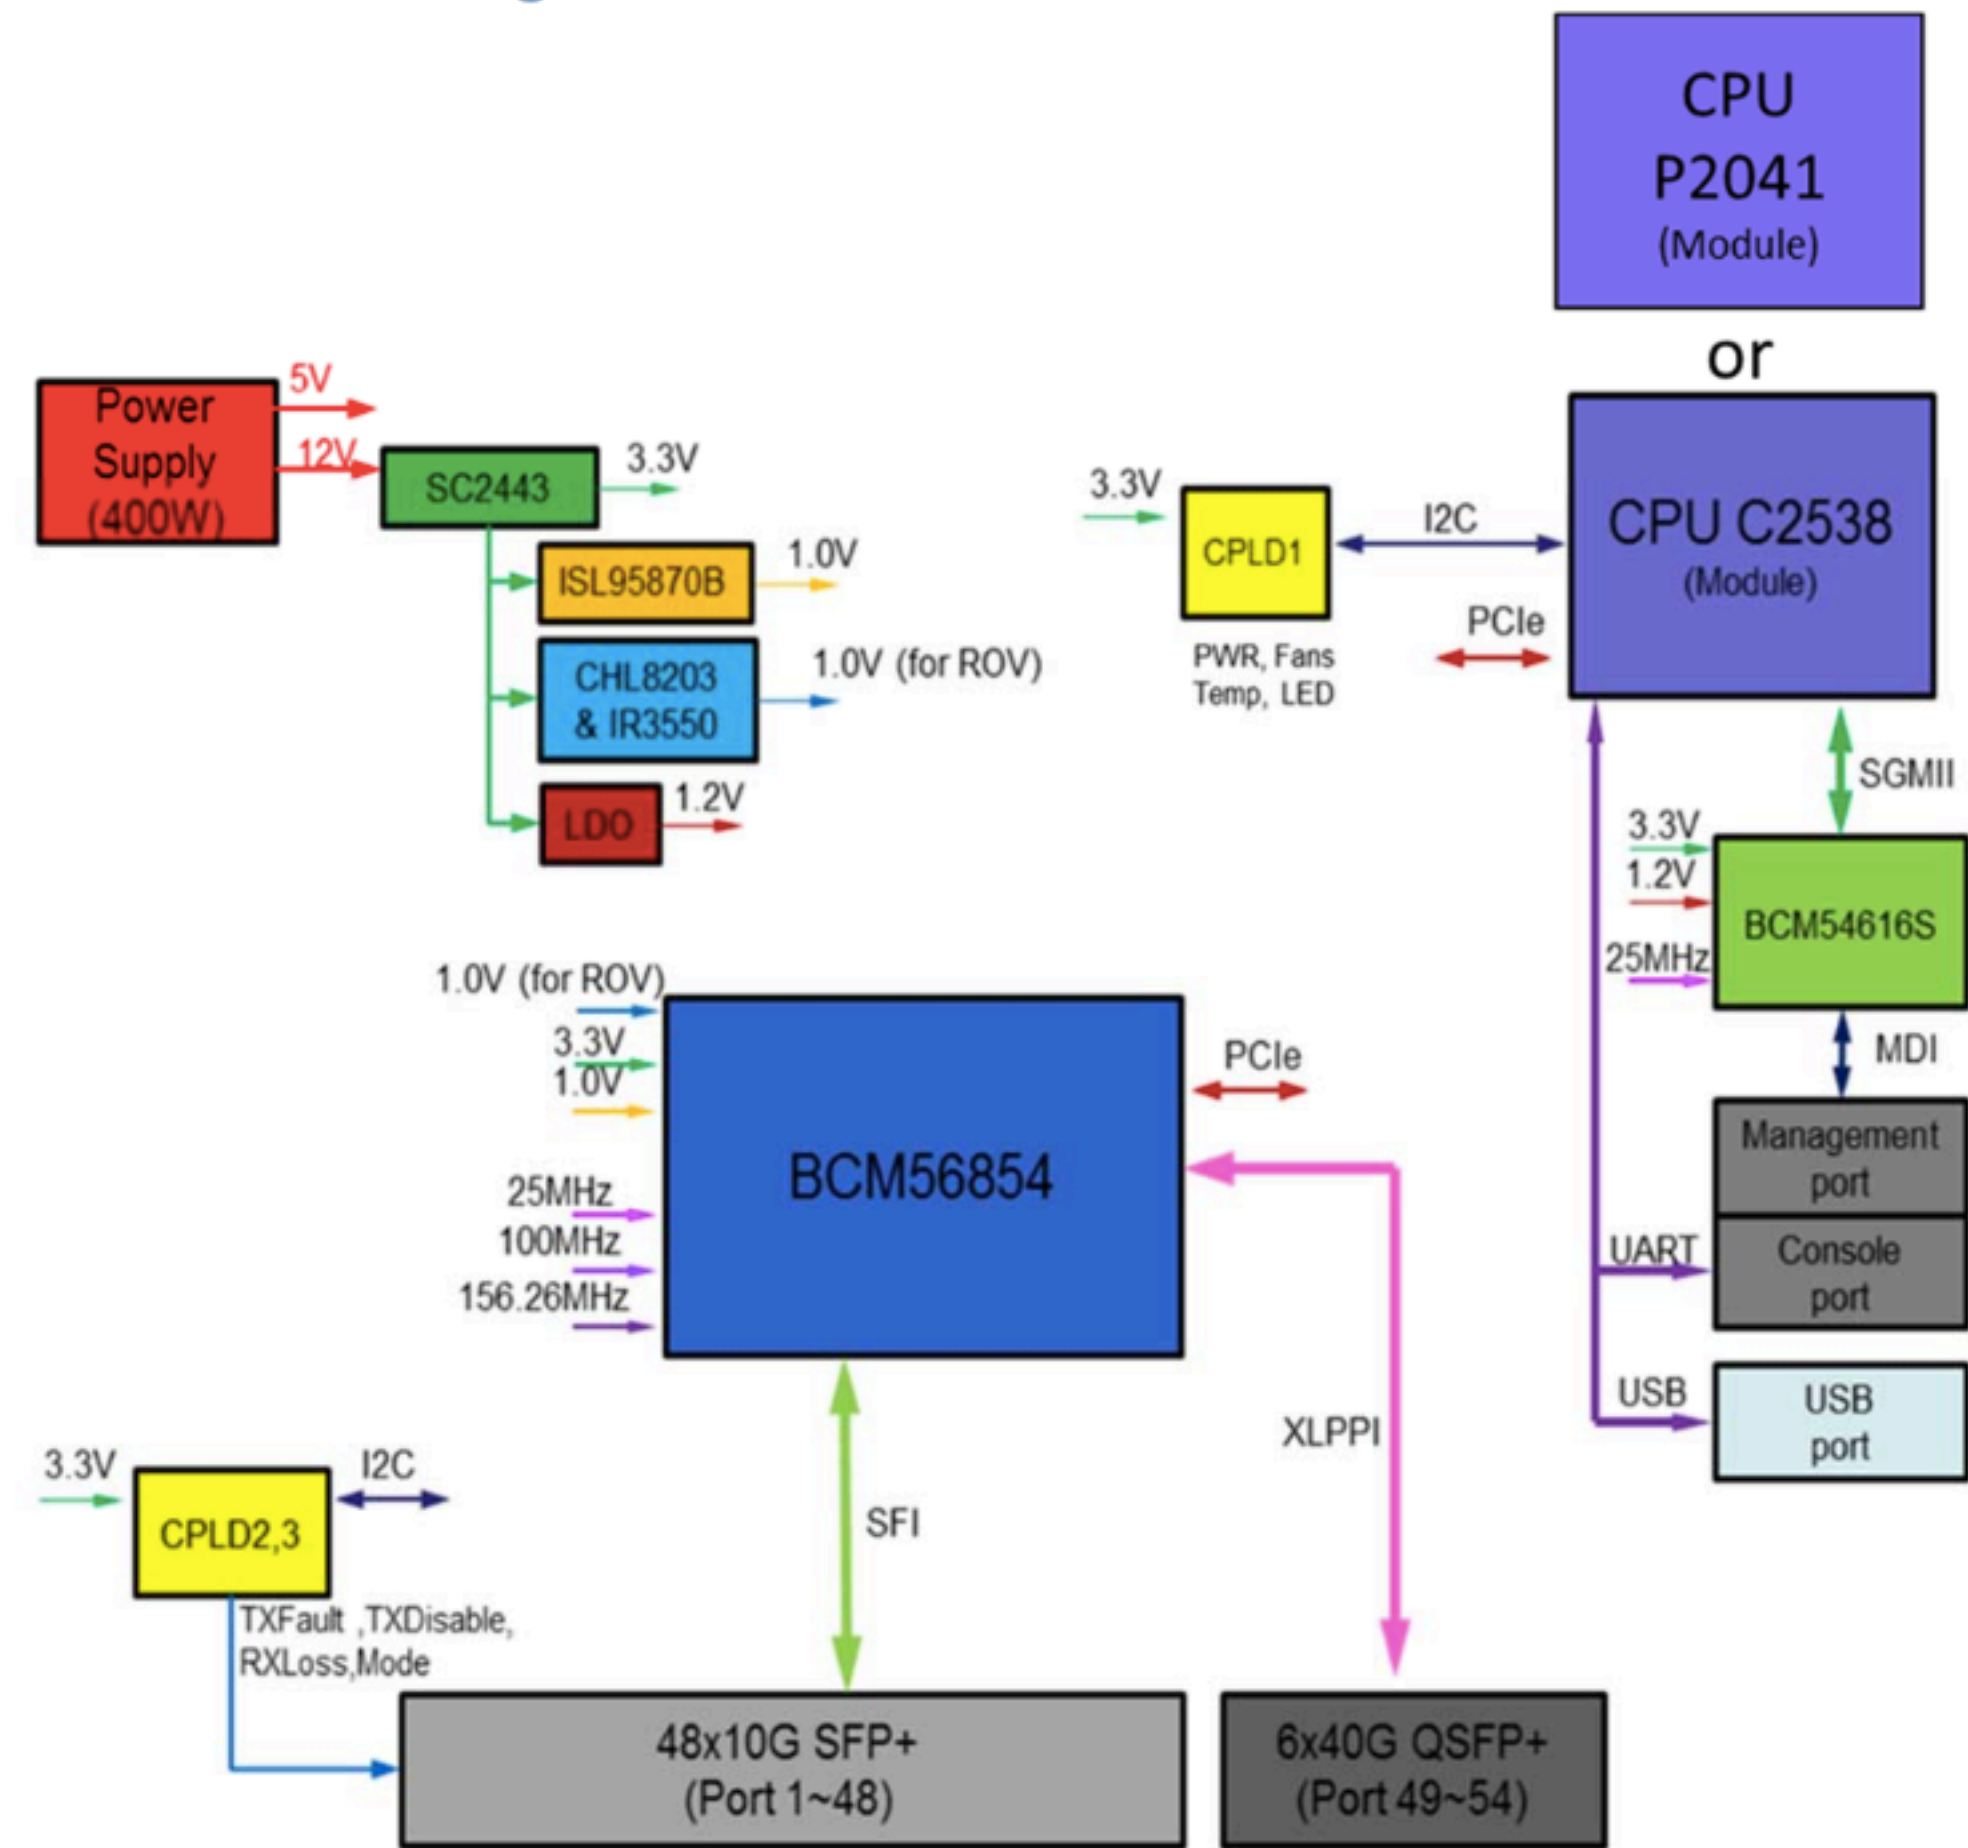

How Open are these switches ?

- Permissive
- Reciprocal

- Schematics
- Gerber files
- BOM files

Some popular ASICs

	Broadcom Trident 2/2+	Broadcom Tomahawk	Mellanox Spectrum
Ports	48 x 10G SFP+, 6 x 40G QSFP+ 48 x 10G T+, 6 x 40G QSFP+ 32 x 40G QSFP+	32 x 100G QSFP28	48 x 10G SFP+, 8 x 100G - QSFP28 48 x 25G SFP28, 8 x 100G - QSFP28 32 x 40G QSFP+
Size	1U	1U	1U, 0.5U
ACLs	3000 (T2+)	512	3000
MACs	160K	72K	180K
Prefixes	128K IPv4 or 20K IPv6	128K IPv4 or 20K IPv6	176K IPv4 or 64K IPv6
Latency	720ns	450ns	300ns
SDK	NDA	NDA	OPEN

*Limits vary depending on setup (l2 heavy / l3 heavy / v6 heavy / etc...)

KILLER ASICS OUT THERE

- **6.4Tbps of Ethernet switching and IP routing**
- **Flexible port configurations:**
 - 16 X 400GbE**
 - 32 X 200GbE**
 - 64 X 100GbE**
 - 128 X 10/25/50GbE**
- **9.52B packets-per-second**
- **Sub 300ns latency**
- **Low power consumption of less than 7 watts per 200GbE port**
- **42MB dynamically-shared, flexible packet buffering**
- **512K MAC/IP/ECMP extendable by +2M IP Routes**

PISA: Protocol Independent Switch Architecture

P4: Programming Protocol-Independent Packet Processors

- **Data plane is not aware of any protocol**
- **Protocols to programmed according to particular needs**
- **Data plane resources to be assigned according to needs**

CONTROL PLANE

| CONTROL PLANE - Bridge / Vlan

ip prefix-list to-backbone seq 5 permit 2.0.0.0/8

ip prefix-list swp3-in seq 5 permit 2.0.0.0/8
```

OPERATIONS AND MAINTENANCE

| OPERATIONS AND MAINTENANCE

- **It's like Linux - so most of the standard Linux automation / management tools are available**
- **It's not Server it's still a switch**
- **There are management softwares available which can bring ease of cloud style principles preserving Freedom of choosing among HW vendors**

THANK YOU

***QUESTIONS ?**
